Evidence Based Strategies for Public Health Practice

ABOUT THE WORKSHOP

This is a blended learning experience with a 2-day face-to-face workshop combined with 3 required webinars. This curriculum is designed to build a toolbox for doing evidence-based practice in public health and empower participants to drive positive change in population health.

Prior to the workshop, participants are required to complete 3 prerecorded webinars 1) Healthy NC 2020 and 2) Evidence Based Strategies 101 and 3) Community Health Assessment.

Participants must also bring a laptop, tablet, or other electronic device for course activities that require internet use.

OBJECTIVES

Participants in this workshop will be able to:

- **Identify** Healthy NC2020 objectives
- **Understand** NC IOM Evidence Based Strategies Task-force Recommendations
- **Understand** how to find Evidence Based Strategies
- **Understand** importance of conducting a community health assessment
- **Understand** the types of data that are appropriate for assessing the needs and assets of the population/community of interest
- **Find** and use disease surveillance data available on the internet
- **Understand** the overall strategic planning process for setting priorities in public health
- **Understand** the components of a sound problem statement
- **Develop** a concise statement of public health goals and objectives
- **Identify** two types of EBS
- **Evaluate** sources of EBS
- **How** to select an EBS that fits local needs and resources
- **Understand** when and how to adapt interventions for different communities and cultures
- **Understand** and apply the basic components of program evaluation
- **Describe** a community health assessment and its role as a core public health functions
- **Identify** the major phrases in a community health assessment process

TARGET AUDIENCE

Local Health Departments, Community Coalitions, Non-profits, Hospitals, and all interested others who work in partnerships and collaborations to improve population health
